PROFILE

A skilled and hard-working web developer with experience in modern web technologies. Strong team player with excellent communication skills. Motivated to learn new concepts and apply knowledge to build robust software.

EDUCATION

2015 – 2019

McGill University – Montreal, Canada
B.A Computer Science & Psychology

June – August 2017

General Assembly – Singapore
Web Development Immersive Graduate

EXPERIENCE

June 2019 – present

Software Development Analyst: Citibank – Mississauga, Ontario
• Developed a web console that allows administrators to switch on/off access to a new large-scale client payment platform
- Utilized technologies such as Angular 7, MongoDB, Couchbase, and Spring Boot.
- Employed agile methodologies in collaboration with an international team
- Managed development workflow by employing Bitbucket and Git source control systems
- Debugged devops issues using TeamCity and Openshift

Projects
• **Citi HR Matching application** – Development team member that created an application for Citi HR to improve the analyst matching process.
- *Angular 8, SQLite, and Python.*
• **Screen Renderer** – Developed a proof of concept to dynamically render HTML forms based on supplied metadata in order to automate the creation of payment forms. Engaged in multiple presentations to upper management to showcase the Renderer.
- *Angular 7 and Citi's internal UI Framework (OmniChannel).*

Summer 2018

Software Developer Intern: Citibank – Mississauga, Ontario
• Development team member that created an internal application allowing developers to easily understand and visualize versions of applications deployed in each environment (SIT, DEV, PROD, etc). Improved software release management process by minimizing versioning ambiguity.
• Main presenter of project to upper management

June – August 2017

General Assembly – Singapore
• Completed a 3 month (~500 hour) intensive web development bootcamp, with an emphasis on modern web technologies and concepts.
Projects
• Worked with a client to visualize and create a website that manages a coworking space.
Ruby on Rails, bootstrap, PostgreSQL
• Created a minimalist website that uses the Spotify API to create and manage playlists.
MongoDB, JavaScript, Express.js, Node.js
• Created an event organizer which allows the user to plan events and search for supermarket items to purchase.
Google charts, Ruby on Rails, PostgreSQL

SKILLS

☕ Core Java & Spring Boot   Ⓐ TypeScript & Angular   </> HTML

🍃 MongoDB   JS JavaScript (Node, Express)   ③ CSS & Bootstrap

🗄 SQL   ◯ Git
